	H361d Suspecte	d of damaging the unborn child.
	H373 May caus exposure	e damage to the hearing organs through prolonged or repeated
		quatic life with long lasting effects.
· Precautionary statements	P101	If medical advice is needed, have product container or label at hand.
	P102	Keep out of reach of children.
	P103	Read carefully and follow all instructions.
	P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
	P260	Do not breathe vapours.
	P273	Avoid release to the environment.
	P280	Wear protective gloves / eye protection.
	P303+P361+P35	53 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower].
	P305+P351+P33	8 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
	P314	Get medical advice/attention if you feel unwell.
	P333+P313	If skin irritation or rash occurs: Get medical advice/attention.
	P403+P235	Store in a well-ventilated place. Keep cool.
	P501	Dispose of contents/container in accordance with local/ regional/national/international regulations.
[·] 2.3 Other hazards		ng and product hardening the network generator is released as ently, take care for adequate air conditioning and for fume quest.

 Additional information: 	For the wording of the listed hazard phrases refer to section 16.	

SECTION 4: First aid measures

· 4.1 Description of first aid measures

· General information:	Take affected persons out into the fresh air.
	Position and transport stably in side position. Symptoms of poisoning may even occur after several hours; therefore medical
	observation for at least 48 hours after the accident.
· After inhalation:	Supply fresh air. If required, provide artificial respiration. Keep patient warm.
	Consult doctor if symptoms persist.
	In case of unconsciousness place patient stably in side position for
	transportation.
· After skin contact:	If skin irritation continues, consult a doctor.
	Immediately wash with water and soap and rinse thoroughly.
· <u>After eye contact:</u>	Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.
· After swallowing:	If symptoms persist consult doctor.
Information for doctor:	With reference to section 2 the formulation contains styrene in the indicated mass concentration range. Styrene fumes will preferably be incorporated by inhalation via respiratory tract, skin resorption is currently considered as an inferior way of incorporation. In case of inhalation styrene is absorbed in a 60-90% range. Distribution in organism occurs rapidly, the maximum blood concentration can be analyzed after one hour after incorporation. Styrene
	exposition affects skin, mucous membranes, and central nervous system (CNS). Acute damages / risks to health:
	In case of styrene poisoning mainly damages to and interactions with central
	nervous system (CNS) arise. In concentration ranges above 200 ml/m3 symptoms such as fatigue, nausea, imbalance and prolonged response times are observed.
	Chronical health risks:
	Effects at central and peripheral nervous system and respiratory tract are evident in literature.
	Main health risks are:
	- prolonged response times
	 reduced cognitive performance, partial amnesia retardation of nervous impulse transition speed
	- disturbances of pulmonary function
· 4.2 Most important symptoms	
and effects, both acute and	
delayed	Headache
delayed	Dizziness
	Dizziness
	Breathing difficulty
	Profuse sweating
	Nausea
· Hazards	Danger of impaired breathing.
	Skin contact with polyester and epoxy resin solutions as ingredient of the product should be avoided due to risks of skin irritations or allergic skin appearances. If (Contd. on page 4)

AKEMI[®]

<u>ade name:</u> Marble Filler 1000 Tran styrene reduced	sparent extra-liquid
	(Contd. of page
	STOKO VITAN (http://www.stoko.com)
	The protection gloves to be used have to comply with the specifications of t directive 89/686/EC and the directive derived decree EN374, respectively, e the above listed protection glove type. The mentioned permeation times' da were generated and verified with material samples of the recommend protection glove type in the scope of laboratory anylyses of the company K GmbH in compliance with EN374.
	This recommendation refers exclusively to the material safety data she referenced product delivered by Akemi and the indicated field of application. case of product dilution or in case of mixture with different substances chemicals, and in condition of EN374 deviation the producer of CE-approv protection gloves must be contacted for detailed information (e.g., KCL Gmb Germany, 36124 Eichenzell, internet: http://www.kcl.de).
	Protective gloves
	The glove material has to be impermeable and resistant to the produte the substance/ the preparation.
	Due to missing tests no recommendation to the glove material can given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetrati times, rates of diffusion and the degradation
Material of gloves	Fluorocarbon rubber (Viton) The selection of the suitable gloves does not only depend on the material, I also on further marks of quality and varies from manufacturer to manufactur As the product is a preparation of several substances, the resistance of the glo material can not be calculated in advance and has therefore to be checked pr to the application.
Penetration time of glove material	Value for the permeation: Level \leq 6, 480 min The exact break trough time has to be found out by the manufacturer of t protective gloves and has to be observed.
For the permanent contact gloves made of the following materials are	
suitable:	Fluorocarbon rubber (Viton) Vitoject (KCL, Art_No. 890)
As protection from splashes gloves	
made of the following materials are suitable:	Fluorocarbon rubber (Viton)
	Vitoject (KCL, Art_No. 890) Butyl rubber, BR Butoject (KCL, Art_No. 897, 898)
	Nitrile rubber, NBR Camatril (KCL, 730, 731, 732, 733)
Not suitable are gloves made of	
the following materials:	Chloroprene rubber, CR Natural rubber, NR Leather gloves Strong material gloves
Eye protection:	Tightly sealed goggles
Body protection:	Solvent resistant protective clothing

· Reproductive toxicity	Suspected of damaging the unborn child.
· STOT-single exposure	Based on available data, the classification criteria are not met.
STOT-repeated exposure	May cause damage to the hearing organs through prolonged or repeated exposure.
 Aspiration hazard 	Based on available data, the classification criteria are not met.

SECTION 12: Ecological information

· 12.1 Toxicity

· Aquatic toxicity:		
25013-15-4 vinyltoluene		
EC50	2.6 mg/l (Bluegill.)	
EC50/48h	1.3 mg/l (daphnia magna)	
ErC50/72h	4.3 mg/l (Pseudokirchneriella subcapitata)	
NOEC	0.563 mg/l (piscis)	
NOELR/72h	1.6 mg/l (green alge)	
NOEC/21d	0.32 mg/l (daphnia magna)	
	0.563 mg/l (piscis)	
EC10	0.25 mg/l (Desmodesmus subspicatus)	
EC50/72h	0.319 mg/l (Desmodesmus subspicatus)	
	5.2 mg/l (Fathead minnow)	
	2.6 mg/l (selenastrum capricornutum)	
LC50/96h	5.2-23.4 mg/l (piscis)	
	5.2 mg/l (pimephales promelas)	
100-42-5 sty	rene	
EC50/96h	6.3 mg/l (Pseudokirchneriella subcapitata)	
EC50	500 mg/l (BES) (ISO Vorschrift 8192-1986 E)	
	5.5 mg/l (Photobac. phosphoreum)	
IC50/72h	4.9 mg/l (green alge)	
	1.4 mg/l (selenastrum capricornutum)	
IC5/8d	>200 mg/l (Scenedesmus quadricauda)	
EC10/16h	72 mg/l (pseudomonas putida)	
EC50/16h	>72 mg/l (pseudomonas putida)	
EC50/8d	>200 mg/l (Scenedesmus quadricauda)	
EC50/72u	>1-<10 mg/l (green alge)
